

A full-page background image of a highly muscular man in a gym setting, performing a bicep curl with a large dumbbell. He is shirtless, showing extreme muscle definition in his chest, shoulders, and arms. The background is a blurred blue and white, suggesting a bright gym environment.

A REVOLUTION IN MUSCLE BUILDING BREAKTHROUGH

To reach your potential, you want formulas that are going to work as hard as you do. Clear Muscle™, Plasma Muscle™ and Phospha Muscle™ will change the way you train, gain and recover.

No two athletes are the same. As a hardcore athlete, every gym session is pivotal to your success. Thresholds will be reached. Plateaus will frustrate and make you want to quit. To help you push through, MuscleTech® has compiled a handy three-part guide to help you battle, break through and build a stronger and better performing version of yourself. A family that trains together sticks together. Get more from your workouts. MuscleTech® is here to help.

THE MUSCLEBUILDING FORMULA FOR AN AWESOME PHYSIQUE

You may have always wanted to enhance muscle mass and increase strength capabilities. But not only that – you may have wondered what it would be like to do this in just a few weeks. How would you feel if I told you that you could do this in just 12 weeks? And now, with a three-part series to enhance muscle size, this can become a reality.

The first of the three-part muscle-packed formula to boost maximum results, Clear Muscle™ will allow you to see rapid muscle gains that you never thought were possible.

Filled with 1,000 mg of BetaTOR®, Clear Muscle™ is your solution to take your muscle size to new heights. This potent formula allows you to become a muscle machine, so you can be the most talked about physique in town.

As a dedicated musclebuilder, empowering your body with increased muscle mass should be your top priority. Clear Muscle™ allows you to boost strength, so you can maximize your training performances with ease.

Massive Muscle Mass

With this powerful supplement, you'll be on your way to a new and improved you! Powered with BetaTOR®, which is derived from leucine, a powerful amino acid, Clear Muscle™ is able to increase protein synthesis for massive muscle growth. BetaTOR® is a free-acid form of HMB (beta-hydroxy-beta-methylbutyrate) a powerful ingredient that helps to reduce protein breakdown to improve your physique with bigger, bulging muscles.

Improve Strength Gains

With its ability to fuel muscle protein, Clear Muscle™ will improve strength gains, so you can perform at a high level during intense training sessions. Clear Muscle™ helps to manage the structure of muscle cells and enables you to rebuild quality muscle for optimal results. HMB supports muscle recovery, thus allowing for more muscle growth and, in turn, maximizing higher power output.

THE PRE-WORKOUT FORMULA TO BOOST MUSCLE ENHANCEMENT

As an athlete or bodybuilder, being able to trust in a quality product isn't easy. The decision may rely on the product's ability to produce quality results. In order to achieve optimal results with strength and muscle size, a performance-enhancing supplement should be taken into consideration.

Packed with 400mg of PEAK ATP®, Plasma Muscle™ is your answer for muscle energy levels and increased muscle size.

Boost Energy Levels

Plasma Muscle™ contains 400mg mg of adenosine triphosphate, which is considered the primary source of energy within the cell, and gives you the muscle stamina needed for quality performances day after day. Though you may think those extra reps may not matter, performing those extra pumps will not only increase strength but also muscle size, so you can enhance body composition quickly and effectively.

Putting the Power Behind the Hour

PEAK ATP® in Plasma Muscle™ is able to boost power, so you can reach peak level performances to maximize your training hour. By increasing your deadlift, squat and bench all while increasing muscularity, your physical appearance will be nothing short of phenomenal.

THE MUSCLE MASS FORMULA TO OVERCOME PERFORMANCE WOES

You've been lacking in achieving quality performance, and your results aren't what they should be. Trying to embark on a new pathway to musclebuilding success requires a high-performance supplement. But is there a product that can get you impressive results?

Phospha Muscle™ can do this and much more. In the third part of this powerful supplement trilogy, Phospha Muscle™ delivers more strength, more muscle, and

supports recovery. Powered by Mediator® Phosphatidic Acid, Phospha Muscle™ greatly improves lean muscle mass, so you can outmuscle your competition.

Amazing Muscle Growth

A protein called mammalian target of rapamycin, or mTOR is an important component for muscle growth. The phosphatidic acid found in Phospha Muscle™, increases mTOR signaling, which enhances muscle growth for better performance, whether at the gym or in the weight room. During high-intensity training, phosphatidic acid increases mTOR signaling, giving you the needed muscle size for a lean and well-defined look.

Enhance Recovery

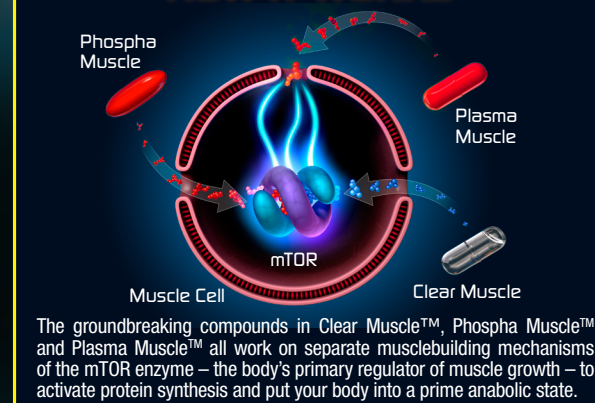

Phospha Muscle™ contains tart cherry fruit powder, which helps reduce muscle damage to the cells – helping to accelerate recovery, so you can maximize your workouts to build quality muscle mass. Tart cherry fruit powder's ability to reduce the muscle soreness that comes with strenuous workouts aids in building muscle – thus providing you with an impressive body figure that only Phospha Muscle™ can offer!

THE MULTI-POWERED FORMULA FOR REAL RESULTS

In the world of bodybuilding and competitive sports, there is no room for error. If you want to take your muscle size to a whole new dimension, then the trilogy of Clear Muscle™, Plasma Muscle™, and Phospha Muscle™ is right for you.

You don't have to suffer from lack of muscle size or poor performance. Instead, put your trust in a multi-powered formula that gives you real results.

HOW IT WORKS

The groundbreaking compounds in Clear Muscle™, Phospha Muscle™ and Plasma Muscle™ all work on separate musclebuilding mechanisms of the mTOR enzyme – the body's primary regulator of muscle growth – to activate protein synthesis and put your body into a prime anabolic state.
